

wherein the host cell comprises a polynucleotide encoding the antigen binding construct of claim 1, and purifying the construct.

69. An isolated polynucleotide or set of isolated polynucleotides comprising at least one nucleic acid sequence that encodes at least one polypeptide of the antigen binding construct according to claim 1.

70. The polynucleotide according to claim 69, wherein the polynucleotide or set of polynucleotides is cDNA.

71. A polynucleotide or set of isolated polynucleotides encoding v5019, v7091, v10000, v5020, or v6717.

72. A vector or set of vectors comprising one or more of the polynucleotides or sets of polynucleotides according to claim 69.

73-75. (canceled)

76. A kit comprising the construct of claim 1 and instructions for use.

77. An article of manufacture comprising:

- (a) a first container comprising a first composition, wherein the first composition comprises the antigen-binding construct of claim 1; and
- (b) a second container comprising a second composition, wherein the second composition comprises a further cytotoxic agent or a therapeutic agent.
